

I'm an over the road truck driver. And I use my xm for all my talk entertainment and weather reports. It's made it a lot easier to access information with out worrying about regular radio reception lost. I pay for this service and I don't see where should concern the National association of Broadcasters. Xm radio caters to the truck drivers and I listen to what I want to. I can access instant reports for a major city I'm going into and that in return helps my decide which is the safest route to take. xm far exceeds any am/fm radio.

P.s. Leave xm alone
